JetSchool SEO changelog: City for sale

Date: November 10, 2026. Page: /aircraft-for-sale/in/<city>.

Technical
A city page exists only when a live public listing names that city.
The URL includes the state, such as /aircraft-for-sale/in/teterboro-nj.
An unknown city returns 404. An airport code alone does not get a page.
The sitemap lists a city only while it has a listing.
A query string is noindex. The canonical URL has no query.

Text
The title is Jetschool: Aircraft for Sale in the city.
The heading states how many live listings are in that city.
Each listing links to its city. The sale index links to every city with a listing.

Tracking
aircraft_for_sale_view records the city slug and the result count.
aircraft_listing_open records the listing id when a card is opened.
