JetSchool SEO changelog: Model for sale

Date: November 10, 2026. Page: /aircraft-for-sale/model/<model>.

Technical
A model page exists only when a live public listing uses that catalog model.
The URL includes the manufacturer, such as /aircraft-for-sale/model/mooney-m20m.
An unknown model returns 404. A typed listing title does not create a page.
The sitemap lists a model only while it has a listing.
A query string is noindex. The canonical URL has no query.

Text
The title is Jetschool: and the model name, then for Sale.
The heading states how many live listings use that model.
Each listing links to its model. The sale index links to every model with a listing.

Tracking
aircraft_for_sale_view records the model slug and the result count.
aircraft_listing_open records the listing id when a card is opened.
